24mm F1.4 DG DN

Art
**A Art**

24mm F1.4 DG DN

Stellar results, anywhere, anytime.

An astrophotography lens for everyday use.

Featuring a very large maximum aperture of F1.4, outstanding suppression of optical aberrations as well as a wealth of thought-out features, the SIGMA 24mm F1.4 DG DN Art enables photographers to capture breathtakingly clear images with ease even in the most demanding lighting conditions. The versatile viewing angle of 24mm and the luxurious brightness of its F1.4 maximum aperture make this lens the perfect choice for all possible situations, from casual snapshots taken indoors to architectural photography. The SIGMA 24mm F1.4 DG DN Art brings the power and pleasure of an astrophotography lens into everyday situations.

**Principal features**

- **Wide viewing angle and astrophotography-level optical performance**
  The fantastic optical performance of the SIGMA 24mm F1.4 DG DN Art is powered by the optimal arrangement of 17 elements in 14 groups, including two FLD, one SLD and four aspherical glass elements. The successful suppression of optical aberrations such as sagittal coma flare, which cannot be corrected by the camera, contributes to lens clarity and accurate point-image reproduction capabilities in every part of the frame. Other unattractive effects such as the tendency for framing of the frame are minimized by its state-of-the-art optical design, and the use of Super Multi-Layer Coating and FLD glass ensures that any flare when shooting the stars at night. The dust- and splash-resistant structure means that the lens itself and the water- and oil-repellent coating of the front element will keep the lens safe and functioning even during shoots in harsher environments. Thoughtful features such as a focus mode switch, a freely configurable AFL button and the aperture ring lock switch to prevent accidental changes further enhance the intuitive and flexible nature of the lens. The petal-type hood has a lock mechanism to prevent unintentional removal. Photographers will especially appreciate the fast yet silent autofocus driven by a stepping motor and the aperture ring click switch that allows for smooth aperture control. With its exceptional optical performance and superb build quality, the SIGMA 24mm F1.4 DG DN Art is the latest result of SIGMA's relentless, uncompromising pursuit of perfection down to the smallest detail.

- **Compact for an F1.4 large-aperture, wide-angle lens beyond belief**
  The SIGMA 24mm F1.4 DG DN Art delivers its brilliant optical performance in a compact, portable and easy-to-use body. Thanks to an optimal placement of each single part, the use of complex aspherical glass elements, the freedom afforded by the short flange-back distance and a flange fit for every single gram, the lens comes at an astonishingly small size and weight. Despite its wide viewing angle and large maximum aperture without any compromise in its optical qualities, with its highly versatile and charming design and the use of each glass element and optimal part resulted in a thorough suppression of optical and other unsightly effects. The SIGMA 24mm F1.4 DG DN Art opens up endless possibilities to anyone who values high optical performance, versatility and convenience, from professional photographers to users who are new to a wide-angle prime lens.

- **Superb build quality with a range of useful features**
  The SIGMA 24mm F1.4 DG DN Art is equipped with both a front filter thread and a rear filter holder, as well as a new MFL switch that disables the focusing ring to prevent accidental changes that will be especially helpful when photographing the stars at night. The dust- and splash-resistant structure of the lens itself and the water- and oil-repellent coating of the front element will keep the lens safe and functioning even during shoots in harsher environments. Thoughtful features such as a focus mode switch, a freely configurable AFL button and the aperture ring lock switch to prevent accidental changes further enhance the intuitive and flexible nature of the lens. The petal-type hood has a lock mechanism to prevent unintentional removal.
